

CAE Blue Phantom

Ultrasound Skills
Trainers

Bridge the gap between ultrasound theory and practice with CAE Blue Phantom. Made with patented materials to match the feel of human tissue, our ultrasound trainers perform seamlessly with any ultrasound system for enhanced realism.

CAE Blue Phantom features over 50 training models designed to help learners understand and practice diagnosing and directing treatment for a wide variety of conditions. Using self-healing Simulex™ tissue, each model can endure at least 1,000 needle sticks. With a model for every specialty, healthcare professionals can incorporate Blue Phantom into their training programs to improve expertise.

CAE Blue Phantom spans many ultrasound specialties, including:

- Abdominal imaging
- Cardiology
- Emergency medicine
- Interventional procedures
- Musculoskeletal
- OB-GYN
- Small parts imaging (breast, thyroid)
- Vascular access & Regional anesthesia

Upgrade Your Ultrasound Expertise

With CAE Blue Phantom, learners can practice a wide range of ultrasound scenarios with best-in-class models.

Durable

Perform procedures repeatedly with self-healing simulated skin.

Realistic

Experience the same acoustic characteristics as human tissue.

Compatible

Use any ultrasound system to incorporate ultrasound training into your existing programs.
