

Durable and lifelike, the expansive CAE Medicor portfolio of clinical skills trainers strengthens the capabilities of healthcare professionals. These products provide a top-tier experience for learning patient safety techniques and increasing quality of care.

Ideal for repetitive use, CAE Medicor helps learners practice and develop basic clinical skills using the:

- Peripheral intravenous (IV) catheterization arm
- Injectable abdomen
- Infant leg for intramuscular injection
- Peripheral intravenous (IV) catheterization hand
- Sticky wound kit

Delivering training anytime, anywhere

The CAE Medicor portfolio features multipurpose products, such as the MultiCube and MultiPad, which support on-site and remote learning. These products are ideal to practice:

- Venipuncture
- Percutaneous injections
- Wound care
- Suture removal
- Urinary catheterization

Elevating quality clinical care

With CAE Medicor, learners can explore a wide range of hands-on training using products with outstanding reliability.

Durable

Repeatedly practice various healthcare situations with limited quality degradation.

Convenient

Non-staining, washable and mold-resistant.

Realistic

MedicSkin, subcutaneous fibers and resistant bones mimic the look and feel of the human body.
