The Hyper-Realistic Moulage Kit (HRMK)

The Hyper-Realistic Moulage Kit provides the capabilities of a professional special effects make-up artist in one highly versatile product. The HRMK inserts Hyper-Realism into any training revolution, increasing the stress inoculation factor for medical and non-medical professionals; greatly decreases the costs when implementing Hyper-Realistic™ casualties into training scenarios because everything is completely reusable. The HRMK is 100% user customizable enabling the order of specific “pages” with the desired wound patterns or types.

The HRMK contains:
- All required supplies needed for wound application and removal
- The ability to produce up to 12.5 gallons of artificial blood
- Step by step instructions for application, removal, cleaning, reusing, and storing of wounds
- Reusable and customizable injury reference cards to increase the realism for casualties as well as simplify wound description and application for non medical personnel
- Removable “pages” of wound patterns for ease of use and accountability

Customizable wound patterns:
- Superficial and deep lacerations
- Closed and compound fractures
- Impaled objects and shrapnel wounds
- Partial and full thickness burns
- Partial upper amputations
- Abdominal eviscerations
- Flail chest and open thoracic injuries
- Extraorbital avulsions with or without ocular injury
- Maxiofacial trauma with and without dental injuries
- Chemical, biological, radiological and nuclear injuries
- Entrance and exit gunshot wounds from multiple calibers - 5.56, 7.62, and 9mm
- All wounds can be applied on any anatomical location to create the desired effect

Unique features:
- Complete re-usability of wounds
- All supplies stored in one portable bag for ease of use and convenience
