The Hyper-Realistic® Moulage Kit provides the capabilities of a professional Special Effects Make-up Artist in one highly versatile product. The HRMK inserts Hyper-Realism into any training revolution, increasing the stress inoculation factor for medical and non-medical professionals; greatly decreases the costs when implementing Hyper-Realistic® casualties into training scenarios because everything is completely reusable. The HRMK is 100% user customizable enabling the order of specific “pages” with the desired wound patterns or types.

The HRMK contains:

• All required supplies needed for wound application and removal
• The ability to produce up to 12.5 gallons of Artificial Blood
• Step by step instructions for application, removal, cleaning, reusing, and storing of wounds
• Reusable and customizable injury reference cards to increase the realism for casualties as well as simplify wound description and application for non medical personnel
• Removable “pages” of wound patterns for ease of use and accountability

All wounds can be applied on any anatomical location to create the desired effect Unique Features

• Complete re-usability of wounds
• All supplies stored in one portable bag for ease of use and convenience

Customizable wound patterns:

• Superficial and deep lacerations
• Closed and compound fractures
• Impaled objects and shrapnel wounds
